FOR WOMEN ON BREAK

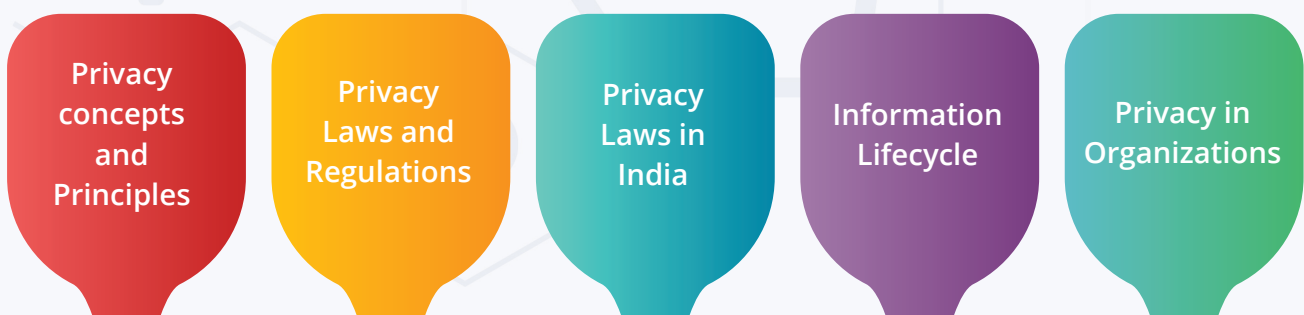

PRIVACY MODULE FOR WOMEN ON BREAK

Rapid emergence of disruptive technologies & digitization of services & transactions is exercising great influence on the functioning of the economy and society. This rapid change and dependence on data to drive businesses and innovation has raised potential threats and risks to privacy of individuals, which nations have sought to tackle through imposition of regulatory requirements, obligations and liabilities to make enterprises accountable. Compliance with regulations is becoming a major challenge faced by organisations, right from the stage of identification of the regulation that they are subject to by virtue of the nature of data they are dealing with and the scope of application of these laws, such as the EU General Data Protection Regulation (GDPR) and India data protection framework etc. To manage privacy challenges and risks, there's a real need for professionals who know the issues and impacts of data privacy.

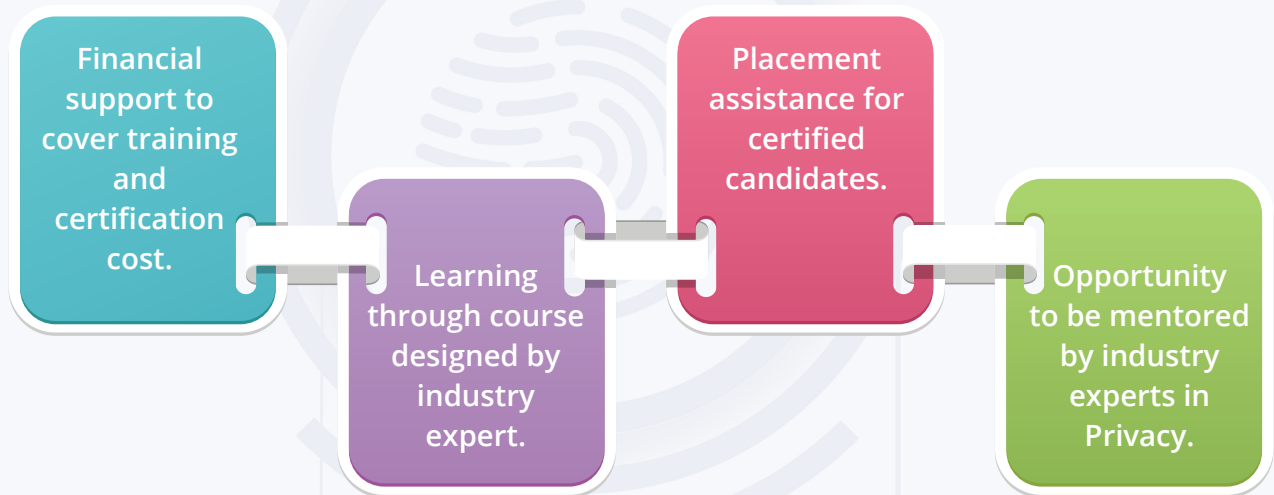

Under the aegis of CyberShikshaa, DSCI and Microsoft are pleased to announce "Privacy Module for Women on Break" for women professionals who are on break presently due to medical, personal or other reasons and want to make career in privacy. As skilled privacy professionals are in high demand, Privacy module training is aligned with DSCI's highly sought after DSCI Certified Privacy professional (DCPP) certification is what employers are looking for. When you earn this credential, you earn the right to be recognized as part of an elite group of knowledgeable, capable and dedicated privacy professionals. This is a pioneer credentialing program which empowers you with knowledge and equips you with necessary skills to advance your career in the field of data privacy.

KEY AREAS COVERED

PROGRAM BENEFITS

Why should you choose "Privacy Module for Women on Break"?

HUGE DEMAND

- According to a research by global job portal Indeed, there has been a 142 per cent rise in job postings and 188 per cent rise in searches for 'Data Protection' job roles.
- According to the Cyber Security Jobs Report 2018-2021, cybercrimes will more than triple the number of job openings over the next five years.
- According to a report by Capgemini Digital Transformation Institute, over half (55%) of companies say that the digital talent gap is widening, and cybersecurity skills rank first in both demand and in talent gap.
