

DSCI Certified Strategist Program

Overview

DSCI Certified Strategist Program is a three-day initiative designed to assist executive leadership and board members in navigating the complex realms of cybersecurity and privacy governance.

Today, the leaders across boards are entrusted with upholding organizational security amid continuous threat exposure and growing privacy concerns while simultaneously crafting resilient strategies and governance frameworks. This can become a daunting task considering how fast the security landscape is evolving.

Henceforth, the DSCI Certified Strategist Program has been crafted to impart invaluable insights, strategies and practical tools to effectively address contemporary cybersecurity challenges.

Program Highlights

Immersive learning experience:

Benefit from the expertise of seasoned industry stalwarts in advancing your governance aptitude.

Strategic empowerment:

Cultivate technically-sound strategic thinking skills necessary for effective governance in cybersecurity and privacy domains.

Enhance your capabilities:

Earn a prestigious certification validating your readiness to tackle evolving threats with confidence.

Program Experience & Outcomes

Experience a bespoke three-day program tailored to deliver contextual insights and strategic acumen in security and governance.

Join an exclusive network of senior cyber strategy professionals, gaining access to a community that supports continuous learning and collaboration.

Engage in high-impact live learning experiences and interact with industry stalwarts.

Develop sophisticated security strategies that seamlessly integrate with business and organizational objectives.

Sharpen your skills with essential planning tools and tactics, increasing your proficiency and impact in strategic decision-making.

Empower yourself with advanced strategic thinking and governance skills, coupled with a transformative approach to cybersecurity.
