

Broad Contours of the Certificate Program

The DSCI Certified Security Solution Engineer Certificate Program is divided into four modules. Workshops for each module will be delivered with a specific 'session Partner'. Each module will have three sessions with a 'session partner', and each session will be of 2.5 hours.

The training will be imparted using a case study driven practical hands on approach and real time exercise in each Module. Handouts will be provided for each session.

- **Credits Certificate:** Credits certificate will be issued to the participants for individual modules. For each credit certificate 12 credits will be required (4 Credits per session).
- **Course Certificate:** The overall 'DSCI Certified Security Solution Engineer' course certificate will be awarded post completion of all the modules and would require minimum 40 Credits.

Delivery Formats

- **E-Learning:** Web based Training including animations, interactivities, etc.
- **Gamified and Interactive Learning:** Engaging solutions and case lets will be discussed with the help of quizzes and polls. Quizzes will be done during and post each session
- **Digital Handouts:** Digital/eBooks accessible and will be provided for each module
- **Video Based Learning:** Interactive Learning with Illustrations and Videos

Workshop Details
